Make Labeling your Signature for Quality and Reliability

## Endurance Modular ID Systems

The Silver Fox Endurance Modular Identification system can be used to identify pipes, valves, junction boxes, cable trays and many other types of equipment.

The system consists of mounting rails available in lengths of 1m in a variety of heights which can be fitted with engraved labels or individual characters.

The modular rails can be attached to virtually anything using various methods of fixing including brackets, screws, adhesive or even cable ties.

### Key Benefits

- ✓ Excellent dimensional stability
- ✓ Resistant to water, mild acids, salt alkalis, petroleum grease, oils and aliphatic solvents
- ✓ The 17mm characters have the unique feature in that they are raised so they never become illegible, even if painted over
